Abstract (en)  
[origin: DE202005011984U1] the sealing arrangement has a floor seal and a closing mechanism for the sliding door which has at least one magnetic element (12) which draws the door panel (11) into the closed position. At least one magnetic element or counter member for a magnet is fitted to an end side of the door panel or door frame. The magnetic element can be mounted axially resilient in a groove in the door panel through a spring element.
