Abstract (en)
The present invention relates to an oven shelf rail arrangement, which is connectable to a carrier structure arranged at a side wall of an oven cavity. The oven shelf rail arrangement according to the invention comprises a fixed rail, for supporting an extractable oven shelf along a side wall of an oven cavity. The fixed rail comprises a longitudinal strip portion, and a fastening lug provided at the strip portion. The strip portion and the fastening lug are integral along a bending line and the fastening lug is bent over the bending line such that the fastening lug projects from the strip portion. The fastening lug is positioned such that the fastening lug is connectable to a carrier structure arranged at a side wall of an oven cavity, whereby the oven shelf rail arrangement is connectable to the carrier structure.
