Abstract (en)

The present invention is directed to a method of managing the issuing of parking rights in an area comprising a plurality of parking places, wherein said parking rights are issued by a parking management party through a plurality of parking operators providing said parking rights to users for parking in said parking spaces. According to said method, providing at least one parking right by a providing parking operator of said parking operators to a user comprises the steps of: receiving from said user, by said providing parking operator, a request for said at least one parking right; said providing parking operator providing said at least one parking right to said user in response to said request by forwarding parking right data of said at least one parking right to a parking database to which said parking operators are operatively connected; and storing said parking right data in said database for managing said issuing of parking rights. The invention is further directed to a parking management system.
