Abstract (en)

[origin: WO2005112664A1] A microwaveable food product (1) is disclosed that is adapted to be cooked or heated prior to consumption, said food product (1) comprising a core of filling (2) which generates moisture on cooking or heating, an outer coating (4) adapted to crisp on cooking or heating, and at least one intermediate barrier layer (3) arranged between the core (21) and the coating (4). The intermediate barrier layer (3) is adapted to substantially prevent migration of moisture between said core (2) and outer coating (4) upon cooking or heating of the product (1), the intermediate barrier layer (3) comprising at least one layer of pasta.
