Abstract (en)
[origin: WO2005110130A1] The invention relates to an ashtray comprising a main body and chambers for receiving cigar and/or cigarette ashes and cigar and/or cigarette butts therein, the ashtray being provided with a central funnel for guiding ashes into the main body, wherein the chambers are shaped as receptacles provided in a second body removably fitted in the main body, said receptacles having open apertures at opposite ends of the second body, and wherein with the second body fitted in the main body, a base-wall of the main body closes off the apertures at the undersides of said receptacles.
