Abstract (en)
[origin: WO2005107891A1] The present invention relates to a training apparatus suitable for rugby training, and can specifically be used to assimilate the back row players of a rugby scrum, without requiring the presence of the other five members of the scrum. The apparatus comprises a ground member (2) having a front end (17) and a back end (18) and four struts (3, 4, 5, 6), each comprising a vertical section at least two perpendicular horizontal bracing members, wherein the first bracing member is positioned closer to the front of the back end (18) of the ground member (2).
