Abstract (en)  
[origin: US2008129015A1] Cross-country or telemark binding ( 10 ) which is mounted on the top face of a ski, especially on a mounting plate ( 12 ) mounted thereon, so as to be longitudinally displaceable (arrow 13 ) and which is lockable in a plurality of sliding positions by means of a locking device ( 14 ). The locking device is subdivided into a first locking unit ( 23 ), which is active only in the forward direction, and a second locking unit ( 24 ), which is active only in the rearward direction, so that on unlocking of that locking unit ( 23 ) which is active only in the forward direction the binding is displaceable only in the forward direction (arrow 25 ) and on unlocking of that locking unit ( 24 ) which is active only in the rearward direction the binding is displaceable only in the rearward direction (arrow 26 ).
