Abstract (en)

[origin: WO2005108013A1] The invention relates to a method for producing a screw connection by means of a cutoff screwdriver (10) which ends the screw-in process of a threaded joint once a pre-determined torque has been reached. According to the invention, data relating to a working process is determined in the cutoff screwdriver (10) and transmitted to an external monitoring unit (20). The invention also relates to a device for carrying out said method, and to a cutoff screwdriver.
