Abstract (en)

[origin: WO2005113379A1] The inventive closure device for a non-vented liquid product dispenser from a rigid container (R) consists of means for removing a product and a movable bottom (1) provided with sealing means and is characterised in that said dispenser comprises a base cup (2) forming a casing fixable to the base of the container and receiving said bottom (1) which is integrally and coaxially arranged therein after the production thereof and prior to product dispensing in such a way that sealing means is protected.
