Abstract (en)
[origin: WO2005116364A1] Disclosed is a device for fastening a cover strip (1) by means of a fixture which is disposed in the joint between a floor covering (5) and a wall (7) and is provided with a bottom leg (4) that engages underneath the floor covering (5) and a wall leg (8) comprising a clamping seat (9) for the cover strip (1), said wall leg (8) being impinged upon by a spring force of at least one spring element (19) that is supported on the front face of the floor covering (5). In order to create advantageous structural conditions, the fixture is composed of a bottom part (2) encompassing the bottom leg (4) and a fixing part (3) comprising the wall leg (8), said fixing part (3) forming a stop (13) that overlaps the floor covering (5) and engages into an insertion guide (6) of the bottom part (2), which extends perpendicular to the floor covering (5), in a manner that is delimited by the stop.
