Abstract (en)

[origin: WO2005117105A2] The invention relates to a film-type, non-compressed composition, in particular for moisture-sensitive, electronic components or devices, containing at least one sorbent (component A); at least one natural or synthetic phyllosilicate (component B); and optionally a liquid phase (component C), in particular water. The invention also relates to a method for producing a composition of this type and to the use of the latter.
