Abstract (en)
The ski has a chassis with a telescopic middle beam (15), a front support (10) at the front of the beam to mount a front wheel (12) and a rear support at the rear of the beam to mount rear wheels. The front support has an articulation (14) situated in front of the front wheel. The front support has springs for recentering the wheel (12), and ball bearings (22, 24) at the articulation to damp the impacts. A braking device with a braking bush acts on the rear wheels.
