Abstract (en)

[origin: EP1749557A2] Device (1) has locking latch which is movable from a movement area that is out of usage condition between base part (11) and positioning part of device parts or between one of these and shoe resting position into locking position that is projecting into the movement area and projecting above one of the device parts (4) or projecting above its base part positioning part. Locking latch can be fixed in the locking position with the locking device (10).
