Abstract (en)

The machine has two units (14, 15) for upright setting of folded box, two empty box-feeding chain conveyors (16, 17), two filling rows (19, 20), an empty box-sequential cycling unit (18), and a linear axis system (21) for filling of folded box. A shuttle control system (8) is provided for the shuttles. The linear axis system completely empties a respective shuttle. The machine empties only the completely filled shuttles.
