Abstract (en)

[origin: EP1749762A1] The assembly has a protective lid (3) temporarily fixed on a container (2) by using an adhesive (20). The container has a flange (4) surrounding an upper opening (5) of the container. The lid has a lower annular edge (14) supported on the flange when the lid is fixed on the container, and indentations (18) extending under a bulged upper surface (16) of the lid. The adhesive is placed between the annular edge of the cover and the flange of the container. Independent claims are also included for the following: (1) a protection lid for temporarily closing a container (2) a method for temporarily closing a container (3) a method for assembling a large mobile waste container.
