Abstract (en)

Sliding hinge window assembly, comprising a window casing and a window leaf, wherein the window leaf has an upper edge and side edges and at a location spaced apart from the upper edge at its side edges at the location of a first hinge -that is preferably substantially stationary therewith- is hinged to a respective first rod or rod assembly, which at the location of a substantially stationary second hinge is hinged to a respective jamb of the window casing, wherein at the area in or near the upper edge the window leaf on both sides is rotatably connected by means of a slide, wherein the window casing is provided with guides for the slide, wherein the assembly furthermore comprises a driver positioned for engagement onto the slide in order to move it.
