Abstract (en)

The present invention provides a silver halide photosensitive material having, on at least one side of a transparent support, at least one photosensitive silver halide emulsion layer, and including an anionic fluorocarbon compound represented by the following formula (1), an anionic hydrocarbon compound represented by the following formula (2), and at least one of an anionic hydrocarbon compound represented by the following formula (3) or an anionic hydrocarbon compound represented by the following formula (4): #####Formula (3) R 3 ##(L 3 ) b ##Z 3  
A silver halide photosensitive material excellent in coated surface state and antistatic property, and a packaged body containing the silver halide photosensitive material are provided.
