Abstract (en)
[origin: EP1750331A1] The electrical plug-in connection (1) has connecting nut (4) and one of the two internal threads (7,28) of connecting nut is segmented and has a first thread at the sides facing the front sides of the connecting nut and the first thread has a cross-sectional profile that is deviating from the threading of the external threads (6, 20). The cross-sectional profile does not interfere with the threading of the mating plug part (3) or of the plug part (2).
