Abstract (en)
[origin: US2007209153A1] An appliance housing for a canister vacuum cleaner having an interior divided into a motor fan chamber and a dust collection chamber includes a flat, upwardly open receiving shell. The receiving shell has a partition dividing the lower housing part into a first bottom portion for the motor fan chamber and a second bottom portion for the dust collection chamber. The second bottom portion includes a surrounding seal portion. An upper housing part is provided including an upwardly and downwardly open, substantially tubular housing insert defining the dust collection chamber. A lower edge of the housing insert is receivable in the surrounding seal portion of the second bottom portion of the lower housing part. A housing cover closes the dust collection chamber.
