Abstract (en)

[origin: WO2005110632A1] Method for the impregnation and rapid and safe removal of asbestos fibers from structures contaminated or coated with said fibers. The method provides for the use of a new non-toxic, non-flammable and easy-to-apply impregnating product comprising the following components: a) organic oligomers, telomers and monomers with molecular weight included in a range of 100 to 5000, preferably in a range of 150 and 1000, and containing functional groups of the epoxy, hydroxy, acid, acrylic, methacrylic and allyl type; b) organic oligomers, telomers and monomers with molecular weight included in a range of 100 to 5000, preferably in a range of 150 and 3000, and containing functional groups capable of reacting with said component a).
