Abstract (en)

[origin: WO2005121482A1] The invention concerns a secure system for transport or preserving valuables, enclosed in a container (1) provided with internal controlling means (10) and means for deteriorating (20, 21) the valuables in case of attack. The invention is characterized in that it consists of at least one container (1) equipped with a memory card (9) reader (8) connected to internal control means (10) and at least one base (11) provided with an electronic map (12) wherein are recorded data concerning the location of the base (11) adapted to receive such that a user may use the container (1) either as a permanent safe for preserving valuables or for transporting the valuables from the fixed located base (11) at a starting point situated at the sender's (2) to a second base (11) at the recipient's (5).
