Abstract (en)

This invention relates to a make up case easy to discharge of powder 1 to open and close a discharge ending 25 by opening and closing the lid coupled with screw 30 to the upper side of the container 10, more particularly, including a cosmetic case 1 which comprises a container 10, middle members 20 for discharging and a lid 30 such that opening and closing a lid coupled with screw 30 to the upper side of the above-mentioned container 10 allows a conical elasticity 26 forming middle members 20 to adjust the discharged powder that accommodated in the container 10 by opening and closing a discharge ending 25 formed to the central portion by the pumping action of emission and compression such case when a lid 30 is open or closed, a discharge ending 25 is thereby open or closed so that powder is easily discharged such that when not used, a middle member 20 became pressed by the screw couple of a lid 30 and thereby a discharge ending 25 is naturally closed to prevent powder accommodated in the container 10 from leaking and reduce the waste of powder so that the cosmetic case 1 and circumference may not be contaminated and can be maintained clean.
