Abstract (en)
The transport and display tray (1) comprises a bottom (2) and circumferential side walls (3, 4, 5, 6). Two opposite side walls (3, 5) are provided with legs (8, 9) hinged on the side wall (3, 5) with a hinge axis extending at right angles to the side wall. There are abutments (10, 14) for the legs (8, 9), which are each pivotal between the abutments (10, 14) about the hinge axis between a leg position in which part of the leg extends down below the level of the bottom (2), and a handle position in which the leg extends above the level of the bottom to serve as a handle.
