Abstract (en)
The object of the present invention is to provide a board game, of which rules can be flexibly set and easily understood by beginners. The solution is a varied and various-colored board game set comprising a varied and various-colored board and pieces. The varied and various-colored board is equipped with two or more players' parts comprising piece collating parts composed of a base frame consisting of cells of 3 x 3 or more, and piece arranging parts composed of the same number of sets of cells as the piece collating parts. Further, on the piece collating parts of the varied and various-colored board, different colors or patterns such as numerals, characters, notations, photos or pictures are displayed in each cell constituting a set of cells, which are not contagious to the longitudinal and transverse directions of said base frame. Furthermore, the above pieces are arranged at the piece arranging parts of the varied and various-colored board, on either side of the piece, a color or pattern is displayed respectively, which coincides with that displayed in each cell at the piece collating parts.
