Abstract (en)
[origin: EP1752259A1] The device has a motor freely arranged in a motor housing (12), and a drive for coupling the motor with a tool. The drive is supported in a separate drive housing. The motor is supported in a separate gear housing (14). The motor is fixed at a drive housing. The drive housing is vibration technically decoupled from the motor housing. The drive housing is connected with the motor housing. Several spring-and damping units are arranged between the motor housing and the drive housing.
