Abstract (en)

Hand tool (2) comprises a first connection (50) having an interacting element (58) for interlocking with a mesh element (52) and a second connection (48) having a locking unit on the handle side and a locking unit on the main housing side. The locking units are connected together using a third locking unit. Preferred Features: The third locking unit is formed by a housing part joined to a housing consisting of a main housing (4) and a handle housing (16).
