Abstract (en)

[origin: EP1752269A1] The present invention relates to a drum-type press (50) for manufacturing clay products comprising a trimmer unit (70) mechanically connected to the press (50) and having a plurality of supports arranged to grasp the products from a face of the drum (58) according to a grasp configuration and to lay them on transport means according to a laying configuration. The trimmer unit (70) comprises means arranged to modify the grasping configuration into a different laying configuration by moving at least one of the supports (86) in a selectively adaptable way. The invention also relates to trimmer units (70) for trimming and laying the products manufactured made by such presses (50) and to a relating method for pressing and trimming the products.
