Abstract (en)  
[origin: EP1752403A1] An accessory device (21) has a first holding element (31) that extends crosswise to a paper web's (9) longitudinal span and across the width of the paper web and is held on both sides of the paper web in carriers (33,34) on either side, one of which has a rotary drive (36). Fastened on one or more carriers there is a second holding element (32).
