Abstract (en)

Self-supporting beam to make a floor (11), comprising a metal reinforcement (12), to which a slab (13) is attached, which comprises a cement mix (23) and a covering layer (24) attached below or laterally to said mix. The covering layer (24) is made with the same type of material as that of the lower surface (11a) of the floor (11) or adjacent wall. In this way uniformity of material is obtained between the lower surface (11a) and the corresponding lower surface of the slab (13).
