Abstract (en)

[origin: EP1752711A1] An electric fire is provided that includes first and second sheets of glass, the sheets being mounted in a frame and a housing respectively. The frame is receivable within an interior portion of the housing. An air blower is provided in an upper portion of the housing and is configured to direct heated air downwardly in front of the first sheet of glass such that it exits the housing in a downward direction.
