Abstract (en)

[origin: US2005130461A1] An electrical miniplugin has a dielectric body formed with an upper array of coplanar seats and a lower array of seats interleaved with the upper seats and lying in a lower plane offset from the upper-seat plane. Respective upper contacts are each unitarily formed with a flat mounting region lying in a respective one of the upper seats on the upper mounting plane, a rear contact end projecting rearwardly from the respective mounting region, and a front contact end projecting forwardly from the respective mounting region. Respective lower contacts are each unitarily formed with a flat mounting region lying in a respective one of the lower seats on the lower mounting plane, a rear contact end projecting rearwardly from the respective mounting region, and a front contact end projecting forwardly from the respective mounting region. All of the front contact ends lie on a common contact plane.
