Abstract (en)
[origin: US2005283883A1] A neoprene fly closure which provides for minimization of bulk through the fly area of a pair of board shorts, which further provides for a more comfortable pair of shorts when worn surfing. The use of a neoprene gore eliminates bulky seams in the fly area, allowing a user to pull shorts on and off and also providing for a privacy shield should the fly area become open. The neoprene gore further provides a plurality of holes in the neoprene having apertures disposed over a substantial portion of the gore such as to provide sand drainage during use.
