Abstract (en)

[origin: WO2005115711A1] The invention relates to a product (11) comprising a layered system (13; 15) that consists of at least one cover layer (15) and a moulding layer (13) that is situated between the cover layer (15) and the product (11). According to the invention, the moulding layer (13) is a plasma polymer layer, which moulds the contours of the product (11) and adheres more strongly to the cover layer (15) than to the product (11). The invention also relates to a method for producing a product (11) of this type comprising a layer system and to respective methods for producing a moulding negative or positive model of (i) parts of the surface or (ii) the surface of a product.
