Abstract (en)

[origin: WO2005118718A1] The invention relates to a method for producing coated substrates comprising a three-dimensionally structured surface. According to said method, a decorative paper containing between 5 and 90 wt. % synthetic polymer fibres, in relation to the total fibre content, is impregnated with a cross-linkable amino resin, is applied to the substrate and three-dimensionally shaped. The invention also relates to amino resin sheets or films and to the use of a modified decorative paper for amino resin sheets or films for the 3D coating.
