Abstract (en)
[origin: WO2005115089A2] A novel process for printing high quality, high resolution, multi-color images on fibrous or porous materials or other ink absorbing materials, or on materials having high surface tension with the ink liquid, and especially over garments, effected by applying a wetting composition, prior to applying an ink composition and formation of the images is disclosed. Pre-printing and printing systems for executing the above process are further disclosed.
