Abstract (en)  
[origin: WO2005119062A1] The invention relates to a fluid circulator comprising a rigid excitable membrane (1) provided with at least one orifice (2) and preferably a fluid manifold (6) which is connected or not to a top (4) or a lower flange (5). A membrane for operating the fluid circulator, a pump comprising said fluid circulator, a propulsion device, a watercraft and the other users of the fluid circulator such as a pump and a mixing device are also disclosed.
