Abstract (en)

[origin: WO2005116940A1] The invention relates to a control system, in particular for the entry into or exit from a multi-storey car park. Said system comprises a barrier and/or display device (1), which bars or permits the passage of the vehicle, an input device (20), which can be actuated in order to permit said passage, the actuation of the input device (20) optionally comprising the receipt of an operation confirmation and an output device (30), which is independent of the input device and which provides at least one information carrier (40). According to the invention, the barrier and/or display device (1) only permits the passage of the vehicle when the information carrier (40) has been removed from the output device (30).
