Abstract (en)

[origin: US2008094251A1] The present invention relates to a control system, in particular for driving in or driving out of a parking garage, with a blocking and/or display device (1), which blocks or allows the passage of a motor vehicle, an input device (20) which is operable to allow the passage, wherein the input device (20) optionally comprises the receipt of an operation confirmation, and an output device (30) independent from the input device, which provides at least one information carrier (40), wherein the blocking and/or display device (1) only allows the passage when the information carrier (40) is removed from the output device (30) (FIG. 2).
