Abstract (en)

[origin: WO2005122206A2] The invention relates to a method for machining a lamp and a lamp machined by said method, comprising a lamp bulb, in which an incandescent means with power supply is housed and which defines a chamber for a filling gas which is tightly sealed by a compression seal. According to the invention, after filling, a part of the lamp bulb is heated by introduction of heat, preferably by means of laser and moulded or refused in order to alter the outer contour of the lamp bulb or tempered.
