Abstract (en)
[origin: DE202005013644U1] When driving with an open side window the driver or the passenger can easily get a sunburn by exposing a naked arm to the sun. The protection sleeve is made of a light textile material for a comfortable feeling on a hot day and is designed as an ordinary sleeve provided with an extension (6) covering the back of the hand. The upper end can also be provided with an extension (5) in order to prevent the sleeve from exposing the shoulder of the user. The sleeve is available in various sizes.
