Abstract (en)

The present invention relates to an isolating flexible cover for use on public show seats, which is coupled to a seat (1), comprising a flap (4), the sides of which are joined to the cover (2), a set of pockets (3), and a band (5), located such that cover (2) may be folded, the band (5) being left on the outside, and the band (5) being able to be folded over itself so as to maintain the folding of the cover (2). The backrest of the seat (1) is introduced between the flap (4) and the inner face of the cover (2) for fixing the cover (2) to the seat (1), the pockets (3) being suspended over the floor in that position. The surfaces of the cover (2) and the band (5) are covered with ornamental or advertising motifs.
