Abstract (en)
[origin: EP1754821A1] Pressing arrangement comprises support parts (2, 4) detachably connected to each other via traction rods (3) which bend in the axial direction and are inserted axially into the support parts. Preferred Features: The traction rods have a thickened part on each end. The traction rods are formed as leaf springs. The thickened parts are arranged in recesses of the support parts. The thickened parts are supported on the bearing surfaces of the support parts.
