Abstract (en)

[origin: WO2005115397A2] The present invention provides compositions of matter, kits and methods for their use in the treatment of kinase-related conditions and/or HMG-CoA reductase-related conditions. In particular, the invention provides compositions for treating immuno-compromised and/or cardiovascular conditions in an animal subject by modulating one or more MAP kinase(s) and/or HMG-CoA reductase, as well as providing formulations and modes of administering such compositions. The invention further provides methods for the rational design of modulators of MAP kinases, HMG-CoA reductase, or both for use in the practice of the present invention.
