Abstract (en)

[origin: WO2005120702A1] The invention relates to a method for the hydrothermal production of multi-metal masses, comprising Mo and V, using essentially exclusively sources from the group of oxides, oxide hydrates, oxy-acids and hydroxides as source of the elemental constituents of the multi-metal oxide masses and a part amount of the source of the included elemental constituents has an oxidation number below the maximum oxidation number thereof.
