Abstract (en)
[origin: WO2005084823A1] The present invention provides an apparatus and process for applying varnish onto a film. The apparatus comprises a coating roller (10) for transferring varnish from the coating roller onto the film (16) and a pressure roller (12) arranged adjacent the coating roller. A means is provided for advancing the film at a first velocity through a gap (44) between the coating roller and the pressure roller in addition to means for rotating the coating roller such that the circumference of the coating roller adjacent the film moves at a second velocity different to the first velocity.
