Abstract (en)
[origin: WO2005123353A1] The invention relates to an electric shaving appliance (1) comprising a drive part (22) which can be driven in an oscillating manner by a electromotor, said drive part transmitting a movement in order to cut hair on a short hair cutter (11) and on a long hair cutter (8). The long hair cutter (8) can be displaced into an entry position and/or an exit position in relation to the housing (2). The invention is characterised in that displacement of the drive part (22) for the short hair cutter (11) is also used as a drive for the exit position of the long hair cutter (8).
