Abstract (en)
[origin: US2008053950A1] A closure element for bottles includes a stopper that engages in the mouth of a bottle, a head having a larger outside diameter than the stopper, a sealing element arranged in a transition region between stopper and head. The sealing element has a first sealing region which bears against the stopper and comprises at least one outwardly pointing sealing bead. The first sealing region has at least one outwardly pointing projection or at least one annular bead which is arranged at a distance from the annular sealing bead and on that side of the sealing bead which faces away from the head. The projection or at least one annular bead has at least one cutout introduced into the circumferential surface of the bead.
