Abstract (en)
[origin: WO2005115889A2] A dispenser (1) for dispensing unit products (3) comprises a container (100) for containing the unit products having an access opening (107) and a dispensing module (300) which is adapted to be connected to the container (100) over the access opening (107) by a first type of child resistant closure connection. A closure (200) is adapted to be connected to the dispensing module (300) by a second type of child resistant closure connection.
