Abstract (en)
[origin: WO2005103413A1] Disclosed is a concrete finishing trowel comprising at least one rotor (4, 5) which is mounted on a frame (1) and is provided with a rotatably driven shaft (6) and several blades (7) that are mounted on the driven shaft (6). A blade deflection mechanism is provided by means of which the blades (7) can be moved on a path that deviates from a circular path relative to the ground when the blades (7) are rotated by the driven shaft (6).
