Abstract (en)
[origin: WO2005124265A1] The invention relates to a hand fire arm, in particular a rapid fire weapon (2), comprising a shoulder support (3) which can be pivoted about a hinge (4) which is disposed on one side of the weapon (2). Said weapon is pivoted in such a manner that it adopts a position, wherein the weapon (2) extends towards the back, and engages in a locking element (8, 13) which is mounted on the other side of the weapon (2). According to the invention, the locking element (8, 13) is at least nondetachable in normal transverse loading, in order to produce said type of the weapon with a rigid rear shaft. The invention also relates to said type of shoulder support.
